DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a computer implemented multimedia content authoring system for managing a plurality of different types of multimedia assets, classified in class 709, subclass 223.
 - II. Claims 12-17, drawn to a computer implemented multimedia method for managing and presenting multimedia content, classified in class 709, subclass 231.
 - III. Claims 18-21, drawn to a computer implemented method for presenting multimedia content, classified in class 709, subclass 400.
 - IV. Claims 22-28, drawn to a computer implemented method for preparing multimedia content for presentation through a viewing device, classified in class 709, subclass 217.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as file management, invention II has separate utility such as managing multimedia, invention III has separate utility such as presenting multimedia and invention IV has separate utility such as preparing multimedia for viewing . See MPEP § 806.05(d).

Art Unit: 2151

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
